PROFILE

Computer Engineering graduate building full-stack products and AI-enabled applications across browser, mobile, and backend systems.

EXPERIENCE

SOCRadar Cyber Intelligence Jul 2025 – Aug 2025

Software Engineer Intern / Istanbul, Türkiye

- Developed a Flask and React LLM proxy that unified access to multiple AI providers through one interface.
- Implemented OAuth2/JWT authentication, encrypted API-key handling, and a React/Tailwind dashboard.

Freelance Systems Developer Jul 2024 – Aug 2025

Self-Employed / Remote

- Built a multithreaded UNIX messaging daemon in C with a thread-safe circular buffer, filtering, and inter-process communication.

PROJECTS

ReelVocab | *TypeScript, Chrome Manifest V3, Mistral API*

- Built a Chrome extension that explains context-dependent expressions in YouTube captions; preparing its first Chrome Web Store submission.
- Isolated model calls in the service worker, stored the user's API key in extension storage, and validated generated suggestions.

Vocabify | *Flutter, Dart, Supabase, PostgreSQL*

- Built a scene-based English-learning app with 27 curated clips and 303 expressions; an Android APK is in private testing.
- Integrated self-assessed review into the feed and server-controlled scoring protected by row-level security.

AutoEDA | *FastAPI, Pandas, Celery, Redis*

- Contributed to a four-person capstone platform for human-approved data cleaning that preserves original datasets and produces separate outputs.

preScan — Breath-Hold Event Detection from Video | *Python, PyTorch, MobileNetV3-Small*

- Developed an offline front-view video prototype that detects breath-hold segments using 15-frame windows; evaluated on 24 videos from six subjects.

LLM Proxy Service | *Flask, React, OAuth2, JWT*

- Internship project: centralized authentication, provider routing, and encrypted credential management for multiple AI APIs.

Izmir Public Transportation Ridership Analysis | *Python, Pandas, Scikit-learn*

- Four-person analysis of 2015–2022 ridership data using EDA, PCA, regression, and clustering; contributed notebook preprocessing, regression models, and figures.

EDUCATION

Izmir University of Economics

Sep 2022 – Jun 2026

B.Sc. Computer Engineering / Full Scholarship

SKILLS

Programming: Python, TypeScript, JavaScript, Dart, C, SQL, Java

Frameworks and tools: React, Flutter, FastAPI, Flask, PyTorch, Supabase, Celery, Redis, Docker, Git

Databases: PostgreSQL, MySQL, SQLite

Spoken languages: Turkish (native), English (B2), German (basic)
